Dated:

To,

12 JUN 2018

All State/UT Drugs Controllers,

Sub: Fluconazole – Hyperpigmentation - Reg.

Sir,

Fluconazole is approved by CDSCO and marketed in the country in various dosage forms.

The National Co-ordination Centre for Pharmacovigilance Programme of India (NCC-PvPI), functioning at IPC Ghaziabad has forwarded their recommendation based on ADR reports on certain medicinal products including Fluconazole, which were discussed by them in the 11th Signal Review Panel (SRP) under the programme meeting held on 05.10.2017 with an objective to detect Signal/Prescribing Information Leaflet change from Indian database and promote patient safety.

In the meeting, the PvPI has evaluated the drug Fluconazole-ADR on the basis of Individual Case Study Reports (ICSR) and recommended CDSCO to take necessary steps to **incorporate Hyperpigmentation as an adverse drug reaction** in to the prescribing information leaflet (PIL) of the drug Fluconazole marketed in the country.

Subsequently, the PvPI recommendations was deliberated in the Subject Expert Committee (SEC-Antimicrobial & Antiviral) meeting held on 22.05.2019 at CDSCO HQR, New Delhi. After detailed deliberation the Committee has recommended that Hyperpigmentation should be incorporated as an adverse

drug reaction in the package insert of the drug Fluconazole as suggested by PvPI.

The recommendation of the SEC has been considered by this office. Accordingly, you are requested to direct the manufacturers of Fluconazole formulations under your jurisdiction to mention Hyperpigmentation as an adverse drug reaction in the label/Package insert/Promotional Literature of the drug.

Action taken in this regard may be intimated to this office.

Yours faithfully,

Dr. S. Eswara Reddy
Drugs Controller General (India)
